VOLUME 29, PART II

SUBJECT INDEX

A

Abrasion.
See also **Wear Testing.**
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Absorption.
The Water Absorption and Penetrability of Brick. J. W. McBurney, 711. Discussion, 731.

Accelerated Test.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Accelerators.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Admixtures.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Age, Effect of.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
The Effect of Storage on the Properties of Turpentine. W. B. Burnett and H. K. Salzberg, 935. Discussion, 939.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Aggregates.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.

VOLUME 29, PART II

Abrasion.
See also **Wear Testing.**
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Absorption.
The Water Absorption and Penetrability of Brick. J. W. McBurney, 711. Discussion, 731.

Accelerated Test.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Accelerators.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Admixtures.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Age, Effect of.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
The Effect of Storage on the Properties of Turpentine. W. B. Burnett and H. K. Salzberg, 935. Discussion, 939.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Aggregates.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.

Aggregates (*Continued*):
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.
Sugar in Sand: A Quick Test to Determine Its Presence Bacteriologically. N. H. Roy, 611. Discussion, 616.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Alloy Steel.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.

Alloys.
Aluminum Alloys for Pressure Die Castings. Sam Tour, 487. Discussion, 505.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.
Classification of Gray-Iron Alloys. J. W. Bolton, 67. Discussion, 142.
Cohesion and Atomic Structure. Edgar Marburg Lecture. Saul Dushman, 7.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
Fatigue Resistance of Some Aluminum Alloys. J. B. Johnson and T. T. Oberg, 339. Discussion, 344.
Fatigue Studies of Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.
Hardness Relationships and Physical Properties of Some Copper Alloys. C. H. Davis and E. L. Munson, 422. Discussion, 434.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.
Static Strength of Plain and Alloy Cast Iron. F. B. Coyle, 87. Discussion, 142.
The Determination and Significance of the Proportional Limit in the Testing of Metals. R. L. Templin, 523. Discussion, 535.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.

Aluminum.
Aluminum Alloys for Pressure Die Castings. Sam Tour, 487. Discussion, 505.
Fatigue Resistance of Some Aluminum Alloys. J. B. Johnson and T. T. Oberg, 339. Discussion, 344.
The Determination and Significance of the Proportional Limit in the Testing of Metals. R. L. Templin, 523. Discussion, 535.

Aluminum (*Continued*):
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.

Apparatus.
See **Testing Apparatus.**

Arbitration Bar.
Correlation of Cast-Iron Test Bars and Castings. W. H. Rother and V. M. Mazurie, 83. Discussion, 142.

Atmospheric Corrosion.
See **Corrosion; Exposure Tests.**

Asphalt.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788. Discussion, 873.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

Atomic Structure.
Cohesion and Atomic Structure. Edgar Marburg Lecture. Saul Dushman, 7.

Autogenous Healing.
The Tensile Autogenous Healing of Portland-Cement Mixtures. Herbert J. Gilkey, 593. Discussion, 608.

B

Bacteriological Testing.
Sugar in Sand: A Quick Test to Determine Its Presence Bacteriologically. N. H. Roy, 611. Discussion, 616.

Ballast.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834. Discussion, 898.

Bars.
Tension, Bend and Impact Tests on Reinforcement Bars. Willis A. Slater and George A. Smith, 183.

Bearing Metal.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.

Bend Testing.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.
Tension, Bend and Impact Tests on Reinforcement Bars. Willis A. Slater and George A. Smith, 183.

Bituminous Materials.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803. Discussion, 873.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788. Discussion, 873.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

Blooms.
See **Forgings; Steel.**

Brass.
Fatigue Studies of Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

Brick.
The Water Absorption and Penetrability of Brick. J. W. McBurney, 711. Discussion, 731.

Brightness.
The True Tinting Strength of White Pigments. G. W. Thompson, 924. Discussion, 929.

Brinell Hardness.
See **Hardness Testing.**

Bronze.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.

C

Cast Iron.
Symposium on Physical Properties of Cast Iron:
Introduction. H. Bornstein, 65.
Classification of Gray-Iron Alloys. J. W. Bolton, 67.
Effect of Section and Various Compositions on Physical Properties of Cast Iron. R. S. MacPherran, 76.
Correlation of Cast-Iron Test Bars and Castings. W. H. Rother and V. M. Mazurie, 83.
Static Strength of Plain and Alloy Cast Iron. F. B. Coyle, 87.
Elastic Properties of Cast Iron. J. T. MacKenzie, 94.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100.
Impact Testing of Cast Iron. H. Bornstein, 109.
Wear Testing of Cast Iron. A. L. Boegehold, 115.
Machineability of Cast Iron. E. J. Lowry, 126.
Corrosion of Cast Iron. H. O. Forrest, 128.
Heat Treatment of Cast Iron. F. B. Coyle, 138.
General Discussion, 142.

Castings.
Aluminum Alloys for Pressure Die Castings. Sam Tour, 487. Discussion, 505.
Correlation of Cast-Iron Test Bars and Castings. W. H. Rother and V. M. Mazurie, 83. Discussion, 142.

Caulking Compounds.
Tests of Elastic Caulking Compounds. H. H. Dutton, 954. Discussion, 960.

Cement.
A Compression Test for Portland Cement. O. L. Moore, 570. Discussion, 585.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Cement (*Continued*):
The Rate of Hydration of Cement Clinker. F. O. Anderegg and D. S. Hubbell, 554. Discussion, 565.
The Tensile Autogenous Healing of Portland-Cement Mixtures. Herbert J. Gilkey, 593. Discussion, 608.

Charpy Test.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.

Cohesion.
Cohesion and Atomic Structure. Edgar Marburg Lecture. Saul Dushman, 7.

Colloidal Clays.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Compression Testing.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.
A Compression Test for Portland Cement. O. L. Moore, 570. Discussion, 585.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That Must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Concrete.
A Compression Test for Portland Cement. O. L. Moore, 570. Discussion, 585.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.

Concrete (*Continued*):
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.
The Tensile Autogenous Healing of Portland-Cement Mixtures. Herbert J. Gilkey, 593. Discussion, 608.

Concrete Reinforcement.
Tension, Bend and Impact Tests on Reinforcement Bars. Willis A. Slater and George A. Smith, 183.

Consistency.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.

Copper.
An X-ray Study of Copper Which Showed Directional Properties on Cupping. Arthur Phillips and Gerald Edmunds, 438. Discussion, 448.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.
Hardness Relationships and Physical Properties of Some Copper Alloys. C. H. Davis and E. L. Munson, 422. Discussion, 434.
Method of Making Copper Replicas of Corroded Metal Objects. E. S. Taylerson, 234.

Corrosion.
Corrosion of Cast Iron. H. O. Forrest, 128. Discussion, 169.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
Discussion on Analysis of Corrosion Data, 232.
Discussion on Corrosion-Fatigue of Metals, 304.
Method of Making Copper Replicas of Corroded Metal Objects. E. S. Taylerson, 234.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Crystal Structure.
Cohesion and Atomic Structure. Edgar Marburg Lecture. Saul Dushman, 7.

Cupping.
An X-ray Study of Copper Which Showed Directional Properties on Cupping. Arthur Phillips and Gerald Edmunds, 438. Discussion, 448.

Curing.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

Cyclic Stress.
See **Fatigue Testing.**

D

Data, Analysis of.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
Discussion on Analysis of Corrosion Data, 232.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.

Definitions of Terms.
See **Nomenclature.**

Diatomaceous Earth.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Die Castings.
Aluminum Alloys for Pressure Die Castings. Sam Tour, 487. Discussion, 505.

Ductility.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

Duralumin.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
Fatigue Resistance of Some Aluminum Alloys. J. B. Johnson and T. T. Oberg, 339. Discussion, 344.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.

Durability Tests.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

E

Elasticity.
Elastic Properties of Cast Iron. J. T. MacKenzie, 94. Discussion, 142.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.
Tests of Elastic Caulking Compounds. H. H. Dutton, 954. Discussion, 960.

Electrical-Resistance Alloys.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Elongation.
See **Tension Testing.**

Endurance Testing.
See **Fatigue Testing.**

Exposure Tests.
Corrosion of Cast Iron. H. O. Forrest, 128. Discussion, 169.

F

Fatigue Testing.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
Discussion on Corrosion-Fatigue of Metals, 304.
Fatigue Resistance of Some Aluminum Alloys. J. B. Johnson and T. T. Oberg, 339. Discussion, 344.
Fatigue Studies of Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.
Fatigue Tests of Large Specimens. R. E. Peterson, 371. Discussion, 380.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Fiber Stress.
See **Fatigue Testing.**

Filler.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788. Discussion, 873.
Tests of Elastic Caulking Compounds. H. H. Dutton, 954. Discussion, 960.

Filtration.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834. Discussion, 898.

Fire Resistance.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
A New Test for Measuring the Fire Resistance of Wood. T. R. Truax and C. A. Harrison, 973. Discussion, 989.

Flexure Testing.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.

Flow.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Forgings.
The Effect of Reduction from Ingot to Forging in Steel Forgings. Lawford H. Fry, 170. Discussion, 181.

G

Gravel.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete, H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.

Gray Iron.
Classification of Gray-Iron Alloys. J. W. Bolton, 67. Discussion, 142.
Effect of Section and Various Compositions on Physical Properties of Cast Iron. R. S. MacPherran, 76. Discussion, 142.

H

Hardness Testing.
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.
Effect of Section and Various Compositions on Physical Properties of Cast Iron. R. S. MacPherran, 76. Discussion, 142.
Hardness Relationships and Physical Properties of Some Copper Alloys. C. H. Davis and E. L. Munson, 422. Discussion, 434.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.

Healing.
The Tensile Autogenous Healing of Portland-Cement Mixtures. Herbert J. Gilkey, 593. Discussion, 608.

Heat Treatment.
Heat Treatment of Cast Iron. F. B. Coyle, 138.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

High Temperature.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Hydration.
The Rate of Hydration of Cement Clinker. F. O. Anderegg and D. S. Hubbell, 554. Discussion, 565.

I

Immersion Tests.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.

Impact Testing
Bearing Bronzes With and Without Zinc. H. J. French and E. M. Staples, 450. Discussion, 483.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
Impact Testing of Cast Iron. H. Bornstein, 109. Discussion, 165.
Tension, Bend and Impact Tests on Reinforcement Bars. Willis A. Slater and George A. Smith, 183.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100. Discussion, 163.

Ingots.
See **Forgings; Steel.**

Inhibitors.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Iron.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.
Symposium on Physical Properties of Cast Iron:
Introduction. H. Bornstein, 65.
Classification of Gray-Iron Alloys. J. W. Bolton, 67.
Effect of Section and Various Compositions on Physical Properties of Cast Iron. R. S. MacPherran, 76.
Correlation of Cast-Iron Test Bars and Castings. W. H. Rother and V. M. Mazurie, 83.
Static Strength of Plain and Alloy Cast Iron. F. B. Coyle, 87.
Elastic Properties of Cast Iron. J. T. MacKenzie, 94.
The Fatigue Properties of Cast Iron. J. B. Kommers, 100.
Impact Testing of Cast Iron. H. Bornstein, 109.
Wear Testing of Cast Iron. A. L. Boegehold, 115.
Machineability of Cast Iron. E. J. Lowry, 126.
Corrosion of Cast Iron. H. O. Forrest, 128.
Heat Treatment of Cast Iron. F. B. Coyle, 138.
General Discussion, 142.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

J

Joints.
Tests of Elastic Caulking Compounds. H. H. Dutton, 954. Discussion, 960.

L

Life Tests.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Lime.
Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

M

Machineability.
Aluminum Alloys for Pressure Die Castings. Sam Tour, 487. Discussion, 505.
Machineability of Cast Iron. E. J. Lowry, 126. Discussion, 166.

Masonry.
The Water Absorption and Penetrability of Brick. J. W. McBurney, 711. Discussion, 731.

Metallography.
An X-ray Study of Copper Which Showed Directional Properties on Cupping. Arthur Phillips and Gerald Edmunds, 438. Discussion, 448.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

Mineral Products.
Fundamental Factors in the Testing of Mineral Products with Special Reference to Slate and Related Materials. Oliver Bowles, 902.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.

Modulus of Rupture.
See **Flexure Testing.**

Monel Metal.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.

Mortar.
A Compression Test for Portland Cement. O. L. Moore, 570. Discussion, 585.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774. Discussion, 867.
The Tensile Autogenous Healing of Portland-Cement Mixtures. Herbert J. Gilkey, 593. Discussion, 608.

N

Natural Products.
Fundamental Factors in the Testing of Mineral Products with Special Reference to Slate and Related Materials. Oliver Bowles, 902.

Naval Stores.
The Effect of Storage on the Properties of Turpentine. W. B. Burnett and H. K. Salzberg, 935. Discussion, 939.

Nickel Silver.
Fatigue Studies of Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

Nickel Steel.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.

Nomenclature.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.

O

Oils.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

P

Paint Vehicles.
The Effect of Storage on the Properties of Turpentine. W. B. Burnett and H. K. Salzberg, 935. Discussion, 939.

Penetration.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.
The Water Absorption and Penetrability of Brick. J. W. McBurney, 711. Discussion, 731.

Phosphor Bronze.
Fatigue Studies of Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

Pigments.
The True Tinting Strength of White Pigments. G. W. Thompson, 924. Discussion, 929.

Plaster.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774. Discussion, 867.

Plasticity.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.

Poisson's Ratio.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values. Raymond E. Davis and G. E. Troxell, 678. Discussion, 702.

Portland Cement.
See **Cement.**

Pounding Tests.
See **Compression Testing.**

Proportional Limit.
The Determination and Significance of the Proportional Limit in the Testing of Metals. R. L. Templin, 523. Discussion, 535.

Protective Coatings.
The True Tinting Strength of White Pigments. G. W. Thompson, 924. Discussion, 929.

R

Railroad Ballast.
See **Ballast.**

Reinforcement Bars.
Tension, Bend and Impact Tests on Reinforcement Bars. Willis A. Slater and George A. Smith, 183.

Replicas.
Method of Making Copper Replicas of Corroded Metal Objects. E. S. Taylerson, 234.

Research.
Cohesion and Atomic Structure. Edgar Marburg Lecture. Saul Dushman, 7.
Needed Research on Mineral Aggregates. F. H. Jackson, 853. Discussion, 899.

Resistor Materials.
Life Tests on Metallic Resistor Materials for Electrical Heating. F. E. Bash and J. W. Harsch, 506. Discussion, 520.

Rheology.
Some Fundamental Definitions of Rheology. Eugene C. Bingham, 909. Discussion, 921.

Rivets.
Method of Making Copper Replicas of Corroded Metal Objects. E. S. Taylerson, 234.

Road Materials.
Aggregates for Low-Coat Untreated Roads. C. N. Conner, 830.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803. Discussion, 873.

Road Materials (*Continued*):
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788. Discussion, 873.
Needed Research on Mineral Aggregates. F. H. Jackson, 853. Discussion, 899.
The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

Rocks.
Fundamental Factors in the Testing of Mineral Products with Special Reference to Slate and Related Materials. Oliver Bowles, 902.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816. Discussion, 889.

Rockwell Hardness.
See **Hardness Testing.**

Rubber.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That Must Withstand Repeated Compression. Harlan A. Depew and E. G. Snyder, 962.

S

Sand.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.
Sugar in Sand: A Quick Test to Determine Its Presence Bacteriologically. N. H. Roy, 611. Discussion, 616.

Scleroscope Hardness.
See **Hardness Testing.**

Sewage Disposal.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834. Discussion, 898.

Sheet Asphalt.
See **Asphalt.**

Sheet Metal.

A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.

Fatigue Studies and Non-Ferrous Sheet Metals. J. R. Townsend and Charles H. Greenall, 353. Discussion, 365.

Hardness Relationships and Physical Properties of Some Copper Alloys. C. H. Davis and E. L. Munson, 422. Discussion, 434.

A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.

Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals. J. R. Townsend, W. A. Straw and C. H. Davis, 381. Discussion, 416.

The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin. H. S. Rawdon, 314. Discussion, 332.

Slag.

Symposium on Mineral Aggregates:

Introduction. R. W. Crum, 740.

Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.

Fine Aggregate in Concrete. H. F. Gonnerman, 754.

Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.

Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.

Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.

Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.

Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.

Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.

Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.

Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.

Needed Research on Mineral Aggregates. F. H. Jackson, 853.

General Discussion, 862.

Tests of Powdered Admixtures in Concrete. Duff A. Abrams, 618. Discussion, 654.

Slate.

Fundamental Factors in the Testing of Mineral Products with Special Reference to Slate and Related Materials. Oliver Bowles, 902.

Softening Point.

The Effect of the Mixing Temperature on the Physical Properties of an Oil Asphalt in a Sheet Asphalt Mixture. John H. Bateman and H. L. Lehmann, 943. Discussion, 951.

Stainless Iron.

Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.

Statistical Analysis.

A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.

Statistical Analysis (*Continued*):
Discussion on Analysis of Corrosion Data, 232.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.

Steel.
Corrosion of Metals Under Cyclic Stress. D. J. McAdam, Jr., 250. Discussion, 304.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets. V. V. Kendall and E. S. Taylerson, 204. Discussion, 232.
Discussion on Corrosion-Fatigue of Metals, 304.
A Method of Treating Data on the Lives of Ferrous Materials. R. F. Passano and Anson Hayes, 220. Discussion, 232.
The Determination and Significance of the Proportional Limit in the Testing of Metals. R. L. Templin, 523. Discussion, 535.
The Effect of Reduction from Ingot to Forging in Steel Forgings. Lawford H. Fry, 170. Discussion, 181.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals. F. N. Speller, I. B. McCorkle and P. F. Mumma, 238. Discussion, 304.

Stone.
Symposium on Mineral Aggregates:
Introduction. R. W. Crum, 740.
Methods of Inspection of Mineral Aggregates. A. S. Rea, 745.
Fine Aggregate in Concrete. H. F. Gonnerman, 754.
Fine Aggregate in Mortar and Plaster. J. C. Pearson, 774.
Fine Aggregate in Bituminous Mixtures. Hugh W. Skidmore, 788.
Effect of Aggregates upon Stability of Bituminous Mixtures. Prévost Hubbard, 803.
Influence of Quality of Coarse Aggregate on Strength of Concrete. F. C. Lang, 811.
Influence of Coarse Aggregate on the Durability of Concrete. F. R. McMillan and George W. Ward, 816.
Influence of Mineral Composition of Aggregates on Fire Resistance of Concrete. S. H. Ingberg, 824.
Aggregates for Low-Cost Untreated Roads. C. N. Conner, 830.
Mineral Aggregates for Sewage Disposal and for Railroad Ballast. Herbert F. Kriege, 834.
Needed Research on Mineral Aggregates. F. H. Jackson, 853.
General Discussion, 862.

Sugar.
Sugar in Sand: A Quick Test to Determine Its Presence Bacteriologically. N. H. Roy, 611. Discussion, 616.

T

Temperature, Effect of.

Peterson, R. E.
Fatigue Tests of Large Specimens, 371.
Discussion, 380.
Phillips, Arthur.
An X-ray Study of Copper Which Showed Directional Properties on Cupping, 438.
Discussion, 449.
Proudley, C. E.
Discussion, 896.
Purrington, W. F.
Discussion, 867.

R

Rawdon, H. S.
The Effect of Corrosion, Accompanied by Stress, on the Tensile Properties of Sheet Duralumin, 314.
Discussion, 337.
Rea, A. S.
Methods of Inspection of Mineral Aggregates, 745.
Discussion, 862.
Richart, F. E.
Discussion, 702.
Rogers, T. H.
Discussion, 951.

Rother, W. H.
Correlation of Cast-Iron Test Bars and Castings, 83.
Discussion, 151.
Roy, N. H.
Sugar in Sand: A Quick Test to Determine Its Presence Bacteriologically, 611.
Discussion, 617.

S

Salzberg, H. K.
The Effect of Storage on the Properties of Turpentine, 935.
Shaw, J. S.
Discussion, 142, 165.
Shoemaker, R. J.
Discussion, 483.
Skidmore, H. W.
Fine Aggregate in Bituminous Mixtures, 788.
Discussion, 874.
Slater, W. A.
Tension, Bend and Impact Tests on Reinforcement Bars, 183.
Discussion, 654.
Smith, G. A.
Tension, Bend and Impact Tests on Reinforcement Bars, 183.
Discussion, 660.
Smith, H. E.
Discussion, 309, 484.
Smith, H. L. H.
Discussion, 232.
Snyder, E. G.
The Use of a Group of Performance Tests for Evaluating Rubber Compounds That must Withstand Repeated Compression, 962.
Speller, F. N.
The Influence of Corrosion Accelerators and Inhibitors on Fatigue of Ferrous Metals, 238.
Discussion, 181, 304, 309, 310.
Staples, E. M.
Bearing Bronzes With and Without Zinc, 450.
Straw, W. A.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals, 381.
Discussion, 420.
Stutz, G. F. A.
Discussion, 929.
Sugimura, Ihei.
Discussion, 155.

T

Talbot, A. N.
Discussion, 899.
Tayler, T. C.
Discussion, 731.
Taylerson, E. S.
A Critical Study of the A.S.T.M. Corrosion Data on Uncoated Commercial Iron and Steel Sheets, 204.
Method of Making Copper Replicas of Corroded Metal Objects, 234.

Templin, R. L.
The Determination and Significance of the Proportional Limit in the Testing of Metals, 523.
Discussion, 304, 350, 436.
Thompson, G. W.
The True Tinting Strength of White Pigments, 924.
Tour, Sam.
Aluminum Alloys for Pressure Die Castings, 487.
Townsend, J. R.
Fatigue Studies of Non-Ferrous Sheet Metals, 353.
Physical Properties and Methods of Test for Some Sheet Non-Ferrous Metals, 381.
Discussion, 369, 420.
Tremper, Bailey.
Discussion, 887.
Troxell, G. E.
Modulus of Elasticity and Poisson's Ratio for Concrete, and the Influence of Age and Other Factors upon These Values, 678.
Discussion, 709.
Truax, T. R.
A New Test for Measuring the Fire Resistance of Wood, 973.
Discussion, 989.
Tuckerman, L. B.
Discussion, 344, 365, 538.

U

Ulman, M. H.
Discussion, 862, 873.

V

Vanick, J. S.
Discussion, 151.
Vogt, Fredrik.
Discussion, 703.
Veitch, F. P.
Discussion, 939, 940, 942.

W

Walker, P. H.
Discussion, 942.
Walker, Stanton.
Discussion, 866, 869, 892, 898.
Ward, G. W.
Influence of Coarse Aggregate on the Durability of Concrete, 816.
Wheeler, R. J.
Discussion, 420.
Whittemore, H. L.
Discussion, 416.
Williams, L. E.
Discussion, 863.
Withey, M. O.
Discussion, 550.
Witt, J. C.
Discussion, 568, 616.
